

*System.Windows.Window*

*System.Windows.Markup.IComponentConnector*

*Prototype.ModifAssociation*

```
graph BT; A[Prototype.ModifAssociation] --> B[System.Windows.Window]; A --> C[System.Windows.Markup.IComponentConnector];
```

The diagram illustrates a generalization relationship. A box labeled 'Prototype.ModifAssociation' is positioned below two other boxes. Two vertical lines extend upwards from the top corners of the 'Prototype.ModifAssociation' box, and they are connected by a horizontal line. From the center of this horizontal line, two arrows point upwards to the bottom centers of the 'System.Windows.Window' and 'System.Windows.Markup.IComponentConnector' boxes, indicating that 'Prototype.ModifAssociation' is a generalization of both.
