

*System.Windows.Window*

*System.Windows.Markup.IComponentConnector*

*Prototype.AjoutEnseignant*

```
graph BT; PE[Prototype.AjoutEnseignant] --> SWW[System.Windows.Window]; PE --> SWMC[System.Windows.Markup.IComponentConnector];
```

The diagram illustrates an inheritance relationship. A box labeled 'Prototype.AjoutEnseignant' is positioned at the bottom. Two boxes are positioned above it: 'System.Windows.Window' on the left and 'System.Windows.Markup.IComponentConnector' on the right. A horizontal line connects the two upper boxes, with a vertical line extending downwards from its center to the top of the 'Prototype.AjoutEnseignant' box. From this vertical line, two arrows point upwards to the bottom of each of the two upper boxes, indicating that 'Prototype.AjoutEnseignant' inherits from both 'System.Windows.Window' and 'System.Windows.Markup.IComponentConnector'.
